PERMIT NOTES:

- 1.) This IP Connect project will provide Switched Ethernet service to 12080 73rd Ave. N, Maple Grove, MN.
- 2.) Begin at existing HH13/HH13, jet new U024 fiber through existing duct approximately 110' west and place new 30"x48" Handhole to be labeled HH12080-73.
- 3.) Jet approximately 287' north of new U024 fiber in existing CBO to customer's DMARC.
- 4.) All disturbed surfaces will be restored to as good as or better condition than found condition.
- 5.) All existing underground utilities will be located prior to construction.

The subsurface utility information in this plan is utility quality level D. This utility level was determined according to the guidelines of CI/ASCE 38-02, entitled "Standard Guidelines for the collection and depiction of existing subsurface utility data. It shall be the contractors responsibility to utilize the Gopher State One Call Evacuation Notice system required by MN statute Chapter 216d for all underground utility locations.
