- PERMIT NOTES:**
- 1.) This IP Connect project will provide Switched Ethernet service to 16450 County Road 30, Maple Grove, MN.
 - 2.) Begin at existing handhole HH711-21, jet new U024 fiber through existing duct 200' northeast and place a new 30"x48" handhole over existing duct. Bore new 2" plastic CBO and new fiber 140' southeast to customer's building.
 - 3.) All disturbed surfaces will be restored to as good as or better condition than found condition.
 - 4.) All existing underground utilities will be located prior to construction.

The subsurface utility information in this plan is utility quality level D. This utility level was determined according to the guidelines of CI/ASCE 38-02, entitled "Standard Guidelines for the collection and depiction of existing subsurface utility data. It shall be the contractors responsibility to utilize the Gopher State One Call Evacuation Notice system required by MN statute Chapter 216d for all underground utility locations.
