General Information:

Remove twistouts from trim only where breakers will be installed. All openings must be filled with breakers or filler plates. Circuit breaker overload trip position is indicated by handle position midway between ON and OFF. To reset, move handle to OFF position then turn ON.

Short Circuit Current Rating (Wathour Meter not included in short circuit rating)

This panelboard has a Siemens Type QNH or MD-HT (rated 22k AIC) circuit breaker installed and has a maximum short circuit rating of 22,000 RMS symmetrical amperes, 120/240 volts AC. The actual rating is equal to the lowest rating of any breaker installed. If the circuit breaker is replaced, use only Siemens Type QNH or MD-HT.

Warning: This equipment has been designed for use only with circuit breakers listed above. Use of other circuit breakers in this equipment could result in personal injury or property damage and will void the warranty.

Important: Do not allow petroleum based (hydrocarbon) sprays, chemicals, solvents or any paint to contact interior components. Petroleum based chemicals can cause degradation of electrical insulating materials.
