

Construction Alert

Comcast is expanding its network to your area and committed to bringing customers the best possible service each and every day. Over the next several days you may notice Comcast contract personnel working on the utility poles or within the public easement adjacent to your property. We will be placing aerial or underground cables and enclosures in these areas.

Because digging may be required, as required by law Comcast will notify other utilities such as water, gas, telephone, and electric companies so they can mark the location of their underground equipment with flags and paint. This will help prevent accidental damage to the buried equipment and reduce the potential for injury, property damage, or service outage.

We ask that you also mark any privately owned underground lines buried within your property's utility easements.

Examples include (but are not limited to):

- Sprinkler systems
- Invisible dog fence
- Supply lines to outdoor lights, detached garages, barbecue grills, decorative fountains, etc.

Please note that locating and marking privately owned lines is not the responsibility of Comcast.

Comcast will restore landscaping that may be disturbed during the construction work. We appreciate your patience and understanding while we work in your neighborhood and around your property.

Please visit <https://midwest.comcast.com/network-expansion/> for more information on frequently asked questions and updates on the construction project.
