

# Construction Alert

Comcast is committed to bringing customers the best possible service each and every day. To meet this goal, it is necessary to perform occasional maintenance work on our broadband network lines. Over the next several days, you may notice Comcast contract personnel working on the utility poles or in the green boxes within the public easement adjacent to your property. We will be placing aerial or underground cables in these areas or performing maintenance work on our existing cables.

Because digging may be required, Comcast will notify other utilities such as water, gas, telephone, and electric companies so they can mark the location of their underground equipment. This will help prevent accidental damage to the buried equipment and reduce the potential for injury, property damage, or service outage.

**We ask that you also mark any privately owned underground lines buried within your property's utility easements. Examples include (but are not limited to):**

- Sprinkler systems
- Invisible dog fence
- Supply lines to outdoor lights, detached garages, barbecue grills, decorative fountains, etc.

Please note that locating and marking privately owned lines is not the responsibility of Comcast. Comcast will restore landscaping that may be disturbed during the construction work.
