

CONSTRUCTION NOTICE

From: Logis
(Construction Contractor)

In order to construct and install a Fiberoptics permission has been granted to Logis place ducts and cable in the boulevard on city and county property or in the utility easement at the side or rear of your property.

STEP 1: LOCATING EXISTING UTILITIES

Just prior to the start of digging, all utility companies will locate their existing under ground facilities and mark them with biodegradable paint and/or flags. If you have any under ground utilities owned by you, please mark these under ground utilities by the use of paint, flags and/or maps and also notify MP Nexlevel of their presence at 763-543-2673

It is recommended to contact a private utility professional to assist. You may refer to:

<http://gopherstateonecall.org/private-facility-locators>

Private utilities include: electric lines from the meter to other buildings/poles/fences, invisible pet fences, landscape lighting, propane lines to the tank, gas grills, pool heaters etc., water supply lines for private wells, irrigation and sprinkler systems, city water lines from the water main to your home, septic lines, tanks, city sewer lines from the sewer main to your home, and field tile. This list is not all inclusive.

Any accidental damage to private utilities may be the responsibility of the owner to have repaired.

Please refer to job number: 25-32285

STEP 2: CONSTRUCTION AND SAFETY

Equipment and workers will be on site to bury the cable. We will see to it that the job is run in a safe manner, however, as construction work is very attractive to children, we ask that residences not allow their children near the construction site. There may be material, equipment or open excavations.

STEP 3: RESTORAL

Once the cables are buried, if restoration to your yard is required, this will be done timely.

Your cooperation and assistance with watering will be very advantageous to the restoration in your yard.

IMPORTANT:

If you have any questions at anytime, have information that would assist with the installation or are not satisfied with some aspect of the job, please call MP Nexlevel, LLC at

763-543-2673 or 763-688-3316

Please refer to job number: 25-32285
